DETAILED ACTION

Claim Rejections - 35 USC § 103

Claims 1, 11-14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over either one of WO 01/85758 to LONZA AG, "An efficient method for activating and recycling of trityl resins" by Harre et al (Reactive and Functional Polymers, 41), "Simple and effective synthesis of 2-chlorotritylchloride resin" by Orosz et al., (Tetrahedron Letters, 39), or "2-chlorotritil chloride resin" by Barlos et al., (Int. J. Peptide Protein Res, 37).

Each of the cited references discloses a styrene-(1%)-divinylbenzene crosslinked resing functionalized with 2-hlorotrityl chloride that is useful for solid state peptide synthesis with physical characteristics corresponding to the claimed characteristics..

The references do not address the coupling of FMOC-Lyc(BOC)-OH capabilities of the disclosed resins, but in view of the similarities of the disclosed and the claimed resins, it is believed that the disclosed resins inherently exhibit the claimed coupling properties. It is further noted that chlorotrityl chloride functionalized styrene resins are well known in the art (since they were fires developed by Barlos), they are commercially available and are used widely for solid state peptide synthesis. Based on the claim language of the product that describes it via functional limitations only (that require three steps to determine the claimed functional characteristics) it is virtually impossible to determine whether the commercially available of literature disclosed products exhibit the claimed characteristics.

Art Unit: 1711

Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application.

In view of difficulties that arise in asserting the properties of prior art products as discussed above, the applicants are requested to provide the most pertinent and closest references disclosing the closest prior art products known to applicants and explain how the prior art reference differ from the claimed product.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Application/Control Number: 10/663,468

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Irina S. Zemel whose telephone number is (571)272-0577. The examiner can normally be reached on Monday-Friday-9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on (571)272-1078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
